

# Delivering World Class Healthcare IT Solution

Healthcare Management Information System

# PARAS: The Most Innovative New Generation Healthcare Suite of Product

Most successful hospitals across the world have realized there is more to a hospital than treating patients. Good hospitals efficiently and effectively manage human, material & financial resources and administrative processes (Registration, Billing, Managing Payer Management etc). Advent of IT and Hospital Management Information System (HMIS) has enabled not just single site hospitals but multi-site locations easy and manageable.

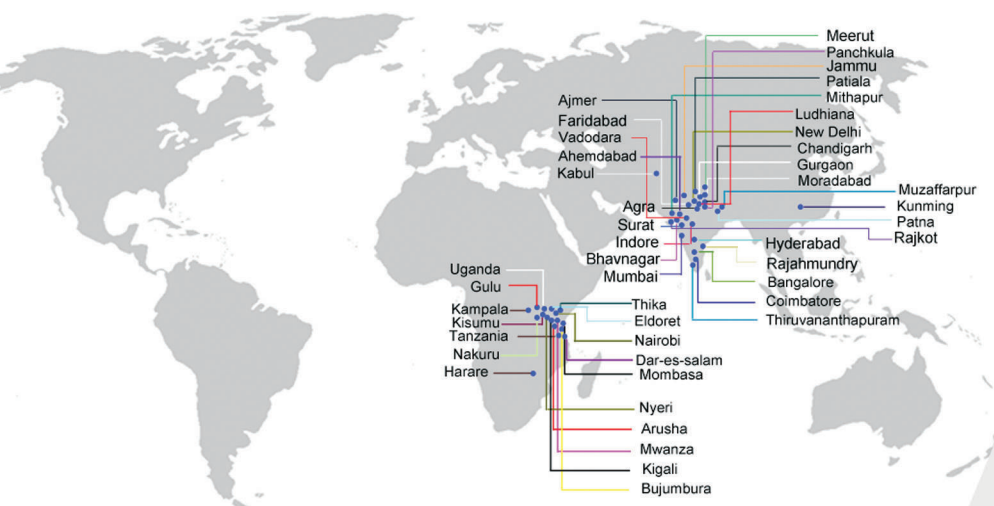

PARAS healthcare suite conforming to best clinical and administrative practices enables bi-directional integration between clinical and business processes to take well informed decisions and work towards safer patient care.

## Differentiated Advantages

- Delivers improved patient care conforming to best clinical and administrative practices
- On-demand applications scalability that ensures non-obsolescence of solution as business grows
- Native multilingual support: Chinese, Vietnamese, Arabic, English version already available
- 100% successful product implementation record across geographies
- Bi-directional integrations between business and Clinical processes. Helps hospital on resource optimization and plug revenue leakages
- Multi - Location product that enables centralization monitoring, intelligent decision making and improved audits & controls

## Extensive Client Footprints

Drawing from our extensive industry experience, Srishti works with clients across the world to automate their hospital through IT intervention

## Compliances

PARAS is compliance with the following international compliances

- Fully Compatible with NABH & JCI crieteria
- Conforms to HL7, HIPPA & ITIH standards
- Capable of integrating with standard CMVs like ICD9, ICD10, CPT 4, SNOMED CT and so

## PARAS Healthcare Solution Suite covers:

### Hospital Information System

- ✓ Cord blood unit record search based on CBB ID

### Telemedicine

- ✓ Seamless care delivery through interconnected disciplines
- ✓ Network enables knowledge to be distributed
- ✓ Strengthen the role of primary care in acute health care

# Srishti Software

progress through creation...

## Testimonial

"Implementing PARAS has immensely enhanced the customer experience that we offer to our patients. Using PARAS the relevant details of the patients of Narayana Nethralaya are recorded and preserved in computer systems and one can retrieve the same by just entering their name or registration numbers into the computer systems during their future visits to the hospital. Thus resulting in effective utilization of the time and immediate treatment to the patients by having their Electronic Medical Record available at finger tips to our doctors and other concerned staffs."

Dr. Bhujang Shetty, Narayana
